Tanisha Poojary

+91-9967242155 tpoojary382@gmail.com LinkedIn Github

Summary

Electronics and Computer Engineering student with specialization in Data Analytics and Data Science. Experienced in data preprocessing, EDA, dashboard creation, and developing data-driven solutions with web development knowledge. Passionate about transforming raw data into actionable insights and supporting data-driven decision-making.

Skills

Programming: Python, C++, JavaScript, SQL
Libraries & Frameworks: Numpy, Pandas, Scikit-learn, PyTorch, Streamlit, React
Data Visualization: PowerBI, Matplotlib, Seaborn
Tools: Git, VS code, Figma, Google Colab, AWS, Vercel
Concepts: EDA, KPI Analysis, Statistical Modelling , NLP , LLM, Agentic AI Frameworks

Experience

Pillai College Of Engineering **June 2026 – August 2026**
Agentic AI Intern *Onsite*

- Developed AI-powered applications using Python, LLMs, and Agentic AI to automate multi-step tasks.
- Designed multi-agent workflows for task planning, reasoning, information retrieval, and autonomous decision-making.
- Implemented RAG pipelines using embeddings and vector databases to generate context-aware and knowledge-grounded responses.
- Built and tested AI applications using LangChain, LangGraph, Streamlit, APIs, and prompt engineering.

Xylofy AI **April 2026 – May 2026**
AI and Data Analyst Intern *Remote*

- Performed data preprocessing, analysis, and visualization to derive actionable insights from business datasets.
- Assisted in developing machine learning workflows for data-driven business solutions.
- Created interactive dashboards and analytical reports to support data-driven decision-making.
- Applied Python, SQL, Excel, and data visualization techniques to analyze and present business insights.

Projects

Quizify | Python, LLM , RAG , Streamlit **August 2026**

- Engineered an **LLM-powered multi-agent learning platform** that transforms unstructured educational PDFs into personalized assessments and adaptive learning recommendations.
- Architected **4 specialized AI agents**—Content, Quiz, Evaluation, and Recommendation—to automate content extraction, question generation, answer evaluation, and learner profiling.
- Implemented a **performance-driven adaptive assessment pipeline** that analyzes quiz outcomes and knowledge gaps to dynamically guide question difficulty and targeted revision.
- Developed an interactive **Streamlit application** integrating the agent workflow for automated quiz generation, real-time evaluation, progress analysis, and personalized learning recommendations.

ProjectFlow | React, TypeScript, FastAPI **May 2026**

- Developed a full-stack **Jira-inspired project management platform** with project tracking, issue management, Kanban boards, sprint planning, dashboards, notifications, and reporting.
- Built a responsive **React + TypeScript** frontend using Tailwind CSS, TanStack Query, Axios, and dnd-kit for interactive drag-and-drop Kanban workflows.
- Engineered a **FastAPI REST backend** with PostgreSQL, SQLAlchemy, Alembic, JWT authentication, refresh tokens, and role-based access control for secure API operations.
- Integrated an **AI Assistant** using Claude API for issue generation, sprint summaries, risk detection, and project insights, with a heuristic fallback for reliable operation.

Leadership & Achievements

- Website Team Member, IEEE PCE – Contributed to website development using HTML, CSS, JavaScript, and React.js.
- 5-Star Rating in Python on Hackerrank.
- Winner, Code with Gen AI – Organized by CSI-PCE.

Education

Pillai College of Engineering, Panvel **2023 – Present**
B.Tech in Electronics and Computer Science *CGPA: 9.2 / 10*

Certifications

- AWS Academy Graduate : Cloud Computing
- Complete AIML and Data Science - Apna College
- Complete Web Development Course – Udemy
- Oracle Certified Agentic AI Foudations Associate
